Short Statement (less than 100 words):

It is my pleasure to apply for the EPS PPD division Board. I had the occasion of seeing the importance of the Board while participating twice to the organization of the EPS-DPP conference. I am a strong advocate of the need of coordination and communication among different communities in the domain of plasma physics, and among different European countries. I particularly appreciate the unique role of EPS-DPP, monitoring that a fair equilibrium is assured in prizes nominations and prestigious presentations at conferences, including different european countries and an adequate women/man ratio. I also consider that its role at large in the plasma community outside Europe is remarkable.
