Short Statement (less than 100 words):

**Dr CASNER, currently Project manager for ICF and HED research at CEA, has been deeply involved in the promotion of our field of research since 15 years. He is a fervent advocate of discovery science research on large scale laser facilities. He has a large international network and recognition (Fabre prize, Landau-Spitzer award 2020) and could serve as point of contact between the European and US communities. At these times of hype for fusion all around the world, science should be at the heart of EPS plasma physics to keep funding available on the long-term, if the fusion bubble bursts sooner or later.**
