Short Statement (less than 100 words):

I nominate Daniela Grasso for her scientific knowledge in plasma physics and for her important achievements in the field, ranging from the laboratory to space plasmas. D. Grasso also has remarkable organizational skills in managing research groups, weaving collaborations and organizing conferences. She is currently playing a leading role in reorganizing the Italian plasma physics community, so I think her presence on the EPS board would be particularly appropriate.

She is a member of the EPS, the scientific committee of the journal "Plasma Physics and Controlled Fusion", and the Equality Committee of the CNR.

FOR THE EPS PLASMA PHYSICS DIVISION BOARD.
